Lab Assignment 07

1: Write a program that takes two numbers from user as input and asks user for the operation to perform and prompts the result. (Using procedures is compulsory, make separate procedure for each operation)

Operation codes:

1=addition (+)

2=subtraction (-)

3= multiplication (*)

4=division (/)

Example:

Enter 1st number: 5

Enter 2nd number: 4

Enter operation to perform: 1

5 + 4 = 9
